

# VELTRAVEL.RO

Industry: Tourism

Company size: 11-50 employees

Solution: Prime Cloud

## The Client

Veltravel.ro is a Romanian search engine for real-time booking, with diverse tourism products, over 15 global databases, and extensive benefits for the clients.

## Challenges

Finding a complete solution that can ensure high performance of the website and 24/7 uptime, but that doesn't require an additional budget for the physical equipment.

## The Collaboration with Prime Telecom

Prime Telecom has implemented the Prime Cloud solution - an IaaS platform, with the following specific services:

 Dedicated Servers with double infrastructure (cloud + secondary data center)

 IaaS cloud services, with real-time redundancy and synchronized writing between two data centers)

 High infrastructure scalability and flexibility

 Maintenance and technical support 24/7/365

 Automated backup procedures and Disaster Recovery

 Internet Connectivity

## Benefits & results

 SysAdmin maintenance over the hardware infrastructure 24/7/365

 Infrastructure scalability and flexibility, even in the busy periods

 Data security for both virtual and physical assets

 Centralized management

 Connectivity, speed, accessibility

**“** Before starting the collaboration with Prime Telecom, there were some technical challenges that only a dedicated specialized team could have solved. But once we began to implement the solution, these technical issues have been addressed rapidly. Also, the booking platform's performance standards support the business growth and help us manage everything easily, even in the busiest periods.
